Hygienic waste without water level

Ref. AT621W

Waste without water level, with membrane

DESCRIPTION

Hygienic waste without water level
Ref. AT621W

Water-free waste M1 1/4".
Waste with a membrane to prevent bad smells.
No water level: dome with a cup with a membrane which can be removed from above.
Membrane can be cleaned and replaced.
Dome, cup and body made from white polypropylene. Membrane made from silicone.
Evacuation flow rate complies with European standard EN 274: 36 lpm.
Waste can be cut to size.
Not suitable for washbasins with an overflow.

ADVANTAGES

- Maximum hygiene: no water level
- Requires minimal space underneath the basin
- Easy to maintain: dome can be removed easily
